9. Conclusion

Resonate Club leverages deep bilateral experience and networks across Korea and the United States to deliver hyper-personalized premium travel experiences that mass-market agencies cannot match. As an F-4 visa holder with equal business operation rights to Korean nationals, and as a lean boutique agency with low fixed costs and healthy margins, the business is positioned for stable, sustainable growth.

Given the sustained growth trajectory of the premium golf and cultural travel market, this business demonstrates strong growth potential. The phased approach — beginning with domestic/international travel agency status and upgrading to comprehensive agency — minimizes financial risk while maximizing market opportunities.
