7. Business Feasibility

Market Perspective

- Korean golf population of 6.24 million, overseas golf travel demand growing at 12.5% CAGR
- 1.3 million US visitors to Korea annually, with surging K-culture-linked luxury inbound demand
- Premium niche market exists that large travel agencies have not adequately addressed

Competitive Perspective

- Founder's 20+ years US residency, golf course hands-on experience, local network, and bicultural understanding — an irreplaceable competitive advantage
- Digital-first one-person corporation model enables minimal fixed costs and high profitability
- Premium customized services provide a predictable revenue structure

Financial Perspective

- Initial required funds of approximately KRW 67.7M — ultra-low-cost structure
 - Annual fixed costs of approximately KRW 13.6M — industry-leading low operating costs
 - Even under the conservative scenario (6 groups/year), Year 1 operating profit of approximately KRW 9.3M projected
 - With 10 groups/year, net profit of approximately KRW 18.7M; additional growth upon comprehensive travel agency upgrade
